

A letter from Celeste Dobbs, to her viewers:

I can not afford an attorney for my son, so I spent what I had to expose the truth on this website, "americanmakinguniversal.org." Please do not ignore or excuse the true. My family and I are very grateful to XXL Magazine/online, for the support and courage in putting my article in one of the largest magazine on the east coast. Your courageous brought in thousands of new viewers to my website, I suspect that the wealthy family of the decrease may have connections with some sort of government intelligence (I has received thousands and thousands, of hits on my website , but only one comment responses). My small family is a family in crisis, we are up against a wealthy, influential, force capable of causing an powerful effect indirectly and in intangible ways. They must feel that they are untouchable, by the same laws that govern the rest of us. This is a Monster that is fearless and corrupt.

But, in this battle with this monster, I have GOD, the true and the people he put into our lives to aid us (XXL magazine, Progress Florida Coalition Blog etc.), paper proof of State officials Conspiracy to appease a wealthy family for the death of their son, by convicting a innocent man of what is clearly a self defense incident that took place on October 25, 2006.

I am requesting help by any means you can offer, even if it's to point me into the right direction to someone or some agency that you know would have the **courage and the means to help us**, John will be taking his case to the Federal Habeas Corpus Court, which means that any criminal attorney from any state could take the case. This website "americanmakinguniversal.org," has been viewed, almost 100,000 times.

Thank You, for your support

Mrs. Celeste Dobbs (a mothers cry for help, for her only son)

A word from John;

John says, he was the only one arrested and searched in the fight involving at least 5 or 6 people. Other then him, they only searched the area, **not** the participants.

Florida Bar Association, never respond to John's letters of complaints in it's entirely, only in part.

Doctor Marie Hansen: (medical examiner)

Listed the manner of death as homicide this is **improper** for a medical examiner to call it a homicide **before** the investigation is over, besides, she testified that she could not say whether he was the aggressor or not. Her diagnosis made it a murder investigation from the beginning.

Rather, then an investigation with the possibility of self defense.
